Accessories which may be purchased separately:

- 1. Projection Screen
- 2. Spare Lamp
- 3. Ceiling Mount

Warning:

Please write down the model number and serial number of this product in the box on the right. MODEL NUMBER:

SERIAL NUMBER:

Warning:

Do not look directly into the light of the lens this could cause damage to your eyes.

Warning: Do not place the projector on a wet surface, as this may result in an electric shock.

Important operating instruction.

A Dangerous voltage indicated.

Installation of remote control batteries:

To avoid damage, remote control batteries must be installed correctly.

Safety Precautions

Specification

Please read this manual carefully prior to operating this projector and save for future reference.

Please follow instructions when operating and/or repairing the projector.

1. Cleaning Instructions

Use a wet cloth with no detergents to wipe the projector. Remember to unplug the power cable first.

2. Accessories

To avoid damage, use only the recommended accessories.

3. Wet Surfaces

Do not place the projector on any wet surfaces.

4. Installation

Please install this projector on a stable surface.

5. Ventilation

For best performance, please clean the filter once a month.

6. Power

Before plugging in the power cable, ensure that the correct voltage is available.

7. Ground Wire

The three pin plug is the ground wire of this projector.

8. Protect the Power Cable

Make sure the power cable is in perfect working condition before using it.

9. Thunder

When not using the projector for an extended period of time or when there is a storm, unplug the power cable.

10. Repair

Due to high voltage, do not open or try to repair the projector by yourself. Refer to a professional technician.

11. Heat

Make sure not to put this projector near any heating devices as it may shorten the life span of the projector.

Troubleshooting

Problem	Possible Causes
The indicator light does not work when the power switch is turned on.	Power cable is not connected properly.The power switch is faulty.
2. The projector does not come on when using the remote control.	 The power switch is turned off. The remote control has no batteries or the batteries are low. The remote control is not being aimed at the IR receiver.
3. No image.	 The input source may not be correct. No input signal. The input cable is not connected. If under PC mode, the PC output frequency is not 50-60Hz. Make sure that the PC output is connected with the projector.
4. Auto-off.	 The projector ventilation is blocked. The voltage is not stable. The projector has overheated - check that the fan is not broken.

Installation

- In order to improve this projector's life span, do not place it on a wet surface.
- The projector should not be placed in direct sunlight.
- Projector working temperature:

-10°C~40 ℃

• Projector storage temperature:

-20°C~50°C

• Do not block the ventilation window of the projector. If the interior temperature of the projector is too high, it will automatically shut down to protect itself from damage.

To prevent this overheating from happening, please clean the filter once a month.

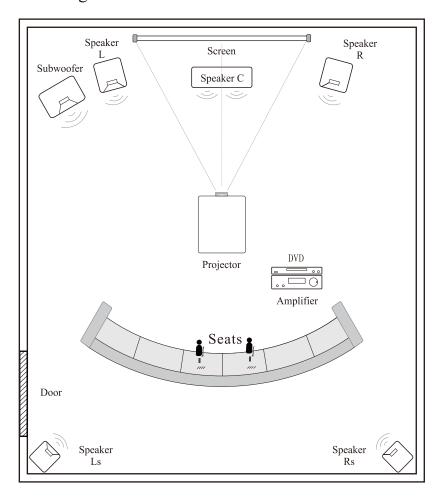

Turning the projector on/off

- To turn on the projector, connect the power cable, then press the "power" key on the panel. It will take a couple of minutes for the lamp to start operating.
- To turn off the projector, press the "power" key again. The lamp will shut off while the fan will continue to work for some seconds.

Installation

Update

Full Setting

Avoid direct sunlight to obtain best quality image. Curtains should be closed if using the projector during the day.

8. Channel Menu and updating.

Channel Menu and Updating

MUSIC	.m4a/.aac		AAC
PICTURE	.jpg/jpeg	Progressive JPEG Baseline JPEG	
	.bmp	BMP	

Standard Setting (Front Projection)

Please refer to the following table to adjust your picture size and distance (from the lens to the screen).

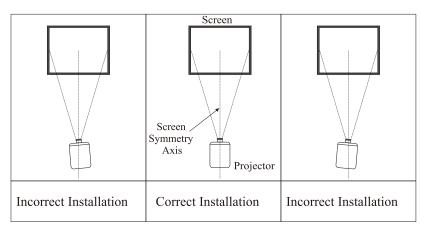

Picture Size	Distance	
	4:3	16:9
50"	2.05m	1.76m
70"	2.86m	2.35m
100"	3.99m	3.41m
120"	4.70m	4.08m

(We suggest that does not over 120 inch for a better viewing.)

Please allow +-3% to the image sizes in the table above. If the distance is less than min data and more than max data, the image could be blurry.

Warning:

Please check the diagram below for the trapezoid adjustment.

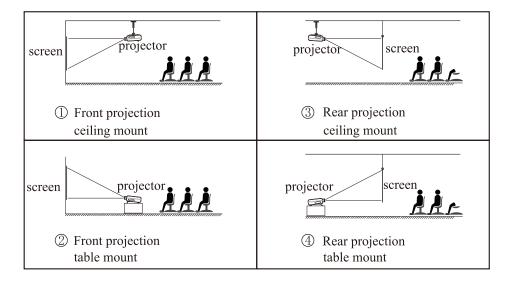

Installation

Menu Settings

Installation Method

Contact a professional installer to mount this projector to a ceiling. Follow the instructions below for the correct projector positions.

Warning:

- 1. This projector may be damaged beyond repair if it is incorrectly mounted on a ceiling or on a surface.
- 2. This projector should only be used in an environment where the temperature does not exceed the range of -10°C~40°C. Projector malfunction may occur if this is not adhered to.
- 3. Malfunction may occur if the projector is subjected to dusty, wet, moist or smokey conditions.
- 4. Poor ventilation could cause overheating which could lead to damage to the projector as well as a life threatening situation.

Picture 3

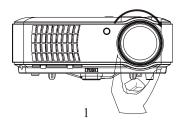

Image Adjustment

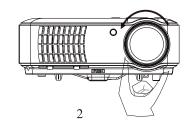

Remote Control Instruction

When operating the projector for the first time, the image may appear unclear or trapezoid. Please follow the following steps for correction:

Focus adjustment

Turn the lens clockwise to the projector, thereafter, slowly turn it counter clockwise. At the same time, check the resolution point. The best position of the lens will be be determined when the image is clear.

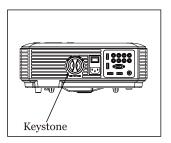

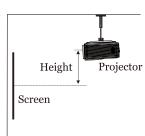

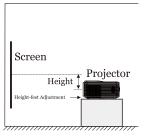

Please note: when moving the projector from a cold to a warm environment, water vapour may occur. Do not turn the projector on until such time as the vapour has disappeared.

Keystone

If a projected picture has keystone distortion, correct the image with keystone adjustment. The image becomes a trapezoid shape when the screen or projector is not level. Please reposition the projector to improve its angle to the screen. However, the circumference of the image may not be focused.

If you are not able to use the keystone correction function to correct the trapezoid disortion, please lower the projector to the center of the screen vertically.

Panel Key Instruction

Turn On/Off the Projector

Panel Key Sketch Map

① Power Key

Press the power key to turn on or switch off the projector. This function is the same as "power" on the remote control.

- 3 Direction Operation Key
 By pressing these keys, preferred menu choices may be made.
- (5) Menu

 By pressing this key, you can adjust the menu by using the Up/Down as well as

Left/Right buttons.

2 Indicator Light

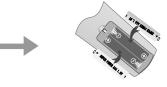

Red: In standby mode Blue: Working

4 Source

Choose the input signal, such as AV, YPbPr, HDMI or PC.

Turning on the projector:

1. Two new batteries should be installed into the remote control before use.

2. Turn on the power switch on the backboard, the indicator light will turn red.

3. Press the power key on the remote control or on the top panel, the indicator light will change to blue.

4. After a few seconds, the lamp will begin to work.

5. When using the projector for the first time, the image may appear blurry or distorted. Refer to the Image Adjustment chapter for instructions.

6. You may also reset the system parameters at anytime. Please refer to the Menu Setting chapter.

Turning off the projector:

1. While using the projector, if you press the "power" key, the projector will enter standby mode.

2. When the projector is in standby mode, its auto protecting system will be activated. To start up, press the power key again.
