351.186 AHD DVR-kit

Startup manual.

Connect the DVR to a monitor or other video source. Connect the mouse to one of the USB ports This can be done with the VGA plug or with a DVI connector. Then connect the cameras with the 18mtr cable to the DVR. Use 1 adapter with splitter cable for the 4 cameras.

Use the 2nd adapter for the DVR set. Then insert the adapters into a wall contact box.

Now the screen will show the following.

Selecteer "Nächtste", met de muis of met de remote.

You will then see a login screen, select OK.

A password does not have to be filled in.

Benutzer Nam	ne admin	
Passwort		
bitte loggen Sie ei	n	
OK	Abbrech	

In the next "field" you can customize the time and language.

Select "Deutscher" and then choose your language, in this case Dutch.

Then select "Nächste".

Then select OK

The device will restart.

	DD MM JJJ	
Tijd Formaat	24-UUR •	
Inschak.		
🔍 Weekdag 🌑	Datum	
Start:	01-05-2016 01:01	
Einde:	01-10-2016 01:01	
Wijzig Taal		
Taal	Nederlands 🔹	
	Previous	Stop

Then press "Next" to continue. Set the time and date correctly, here you can also set the summer and winter time. To activate this select Select DTS, then enter the correct date and time. Then press "Next" when you have a router connected to an UTP cable, and you can see one of these images.

U krijgt nu volgend scherm te zien.

Now press "Network" .

	Wire Netcare 🔨 🗹 DHCP Inschak

If the test went well in the previous step, you can read your IP address here.

If the Test was not good, check the DHCP to get an IP address from your router.

Sometimes the device must be restarted, press OK, then remove the adapter, wait a while, and reconnect again).

Then go back to here.

When you have the device properly connected to your router, and the router has a DHCP server (it has almost every router), you have now received an IP address that should work.Nu kunt u het vinkje weer weg halen bij de DHCP en hier net verkregen IP-adres invullen.(meestal blijft de date gewoon staan). Druk vervolgens op OK en voor de Test opnieuw uit door op "opnieuw proberen" te drukken. De test zou nu goed moeten gaan.

You will now see the next screen.

Using a QR scanner on your smartphone, you can scan any of the above QR codes, depending on your operating system. (Now you can install the Xmeye app)

With the screen you'll see, you can set up the app, later on more.

Set up on an Android device.

Start QR program and scan the Android app QR code and download and install the app.

Or go to the play store and install the "Xmeye" app (huangwanshui).

To install on an iOS device go to page 12.
