151.226 Remote
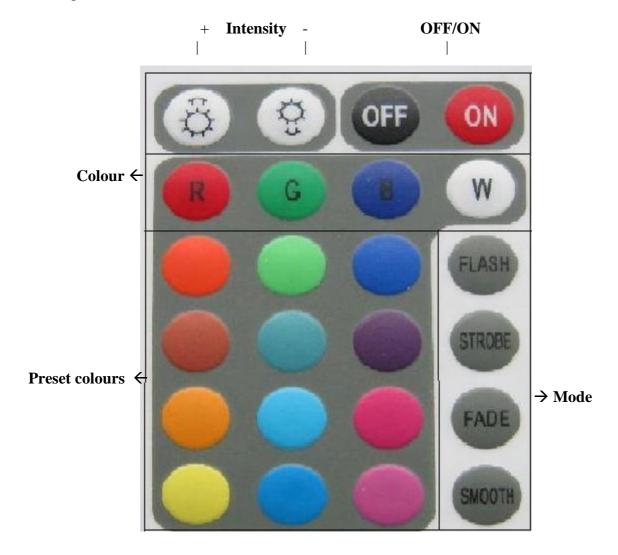

→ power on the unit
→ Press mode key until RENT is displayed; then press ENTER to lock (Remote Entry)
→ now press ON, on the remote control

If unit is switched on, all LED's are switched on.

If you want to set your own colours, press the button which corresponds with the colour you want to change.
Then press the Intensity +/- button to change the intensity of the colour to full or completely off.

You can also select colours directly with the preset colour buttons, with the intensity buttons you can dim the light output.

Mode Buttons

Flash mode: will use a preset program and flash different colours. You can change this with the intensity buttons.

Strobe mode: will use a preset program and flash different colours and patterns. You can change this with the intensity buttons.

Fade mode: will use a preset program and fade different colours. You can change this with the intensity buttons.

Smooth mode: will shut the leds down, you can select any other button to change to something else.
